Sprint Update

- iDen replaced by Network Vision
- CDMA 1x replaced by Network Vision
- CDMA EvDo was scheduled to be replaced by YE 2015.
- WiMax was scheduled to be replaced by YE 2015 but got delayed by court order for 90 days. Should be complete early 2016.

Sprint Update (continued)

- Network Vision (macro cells) has been replaced by NGN (small cells).
- Small cells require lots of backhaul. They are looking at using 2.5G wireless for backhaul instead of leased fiber. It worked for WiMax and cost less.
- Spark has been replaced by LTE Plus.
- LTE Plus takes advantages of beamforming technology and carrier aggregation.
